

DIGITAL LITERACY FOR A DIGITAL WORLD

Every single child has something he/she is good at and with a unique blessing to offer. A child could be a good lawyer, a good doctor, a good architecture or a good scientist among other professions but all these cannot happen unless a child gets a good education.

Education provides opportunity to unlock a child's potential and provide them with knowledge to solve their greatest challenges in life, fight poverty and homelessness.

Good education in the current digital world cannot be in Isolation from digital Literacy.

PEER -TO-PEER DIGITAL WORKSHOP

At St. Benedict Community Centre, offline digital Literacy has worked, is working and will still work to transform the lives of children in Dandora.

On 25th May 2024 we had a peer-to-peer digital workshop for the children to enable those who have mastered the use of the digital gadgets guide those who still struggle to access the contents. The focus points were MsingiPack, Accessing grade contents and the Wikipedia as a reference source. The arrangement was one tablet for two children where one child who knows what to do was guiding the other one. It was exciting seeing children quickly learn from each other, going through their grade level contents and finding the meaning of challenging words from Wikipedia.

Our commitment is to let the children and teachers use the gadgets during the week as we collect the challenges experienced and address them over the weekend using similar approach or any other method that can work to maximize the benefit of the gadgets to the children.

OUR 2024 THEME: LET A CHILD GET INTO THE DIGITAL LIBRARY JUST LIKE A PHISICAL ONE AND LEARN.
